

AMID C. GIGANTE JR.

Cogon, Pardo, Cebu City

jrgiganteamid@gmail.com | (+63) 922 218 3437

PROFESSIONAL SUMMARY

Software Developer with experience building web applications and embedded solutions using .NET, Blazor and ESP32/Arduino technologies. Skilled in designing scalable applications, integrating hardware with software systems, and developing solutions that improve operational efficiency. Passionate about creating practical software solutions and continuously learning new technologies.

TECHNICAL SKILLS

Languages: C#, C/C++, Java, Arduino, Python, HTML, CSS, PHP, JavaScript

Frameworks: .NET Blazor, MudBlazor, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MySQL

Other Skills: Web Development, Embedded Systems, Application Development

FREELANCE SOFTWARE DEVELOPER

Independent Projects

July 2024 - Present

- Developed a centralized web application for part ordering, receiving, and project tracking.
 - Modernized a legacy workflow by rebuilding the system using .NET Blazor Server and MudBlazor.
 - Implemented barcode and QR code scanning to streamline receiving processes.
 - Built dashboards and reporting tools for project monitoring and analytics.
 - Improved operational efficiency by reducing manual processes and simplifying user workflows.
-

PROJECTS

AutoBin - Smart Reverse Vending Machine System(AI-Powered)

Freelance Project | May 2026 - Present

- Developing a smart recycling platform that rewards users with points for recycling plastic bottles.
- Built an ESP32-based reverse vending machine integrated with AI-powered bottle detection using ESP32-CAM and Edge Impulse.

- Implemented plastic bottle classification and rejection of non-recyclable items through object detection.
 - Developed trash bin level monitoring to support maintenance and prevent overflow.
 - Created a web application for user registration, point tracking, and reward redemption.
 - Built an administrative dashboard with recycling statistics, machine monitoring, and redemption management.
 - Focused on combining embedded systems, artificial intelligence, and web technologies to promote sustainable waste management.
-

Reverse Vending Machine (ESP32-Based)

Freelance Project | March 2026 - April 2026

- Developing a recycling reward system that exchanges recyclable bottles and cans for incentives.
 - Designed validation logic for recyclable material detection.
 - Integrated multiple sensors using ESP32 microcontrollers.
 - Implemented automated reward dispensing and monitoring features.
 - Developed water level and waste-capacity monitoring systems.
 - Focused on sustainability through technology-driven recycling solutions.
-

Sanitizing Robot(AI - Based)

Capstone Project | September 2022 – January 2023

- Developed an automated sanitizing robot equipped with facial recognition and thermal imaging.
 - Automated temperature scanning and attendance logging processes.
 - Reduced physical contact during pandemic conditions through autonomous operation.
 - Built a web-based registration and monitoring system.
-

EDUCATION

Bachelor of Science in Information Technology

Cebu Roosevelt Memorial Colleges

2019 – 2023

ACHIEVEMENTS

Programmer of the Year

Cebu Roosevelt Memorial Colleges(2023)
